

- Start
- Choose between signup and sign in.
- If signup, enter username and password, then go back to menu.
- If login, enter user ID; if don't exist, try again or go back to menu.
- If login was successful, show the menu that consists of post, like, delete, info, find user and log out.
- After each, go back to this menu. If like, it mustn't be duplicate.
- If logout, back to the main menu.

End

structs:

```
typedef struct USER_INFO {
```

```
    char* User_Pass;
```

```
    char* Username;
```

```
    char* post;
```

```
    int post_ID;
```

```
    int like;
```

```
    USER_INFO* next;
```

```
} USER_INFO;
```

```
USER_INFO** USERS;
```

an array of structs for
all users, each user's info
in a single array index.
